OFFICE OF the Deputy Commissioner,
Mysore District, Mysore,
Date 21st May 1948

To

Janab Syed Abdul Aleem, B A ,
Secretary to the Government of Mysore,
Revenue Department, B A N G A L O R E

Sir,

Referring to your Memo No L 17049/E dated 20th May 1948 confirming the telegram sent to me yesterday in connection with the objections raised by Muslims and Adijambavas of Nanjangud town regarding the site selected for the construction of the Septic tank in Nanjangud Town, I have the honour to state as follows -

On 6th May 1948, when I was at Nanjangud, some of the Muslims residents of the town presented me a petition objecting to the construction of the Septic tank near their burial ground Then I called for a report on the petition from the President, Town Municipal Council, Nanjangud His report (No O C 248/47 dated 14th May 1948) received in this connection, is enclosed herewith for favour of perusal

As could be seen from his report, the construction of the Septic tank was originally thought of in a private garden and later on the idea was changed consequent on the personal inspection of sites by the Sanitary Engineer The Sanitary Engineer, in his report to the Chief Engineer (a copy of which has also been enclosed) has stated that the construction of this Septic tank in the place at present objected to is the advantageous one both from the engineering point of view and as also from the point of view of cost

I have, however, issued a stay order to stop furtner construction of the tank as directed by Govern-

28
4 9

Government and I shall personally inspect the spot very early, with the Sanitary Engineer, as I am just now busy in connection with the visit of His Highness the Maharaja of Mysore to Thumbusoge on 23rd May 1948 and send a detail report by very early

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Mysore District
21/5/48

133

Letter No O C 248/47 dated 14-5-1948 from the President, Town Municipal Council, Nanjangud, to the Deputy Commissioner, Mysore

---

Representation by Muslim Citizens of Nanjangud regarding the construction of a Septic Tank near the burial ground of Muslims

---

I have the honour to submit that the Septic tank was originally proposed to be built in a private garden near the Hullahalli channel That idea was abandoned for various reasons and the location of the Septic tank now under construction was fixed on an inspection made by the Sanitary Engineer The Sanitary Engineer has made an exhaustive report on this point which is submitted for your kind information The Municipal Council also has agreed to the alteration The Muslims have another burial ground also and they have been removing their corps to that burial ground

Apart from this I may be permitted to observe that the location of the new Septic tank will be close to the Adijambava Colony

If the Septic tank is to be chan ed from this place this brings a lot of complications in its working Firstly, there is no suitable place, Secondly the drainage will have to pass wet lands which will have to be acquired, which means heavy cost, Thirdly the sullage water now being allowed to the Irrigation Channel will have to be continued for some more time till this matter is settled which will cause great unhealthiness

However, I have asked the contractor to stop the work for some time

I shall be glad if you can please make a personal inspection I understand the Sanitary Engineer is visiting this place and I shall discuss this point with him and have an inspection made

'Copy'

Deputy Commissioner,
Mysore District

Copy of letter No 1327 dated 10-5-1947 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Chief Engineer for Roads and Buildings in Mysore, Bangalore

---

Re Proposal for locating the Septic tank for the extension portion of Nanjangud town

---

I have the honour to state that an estimate amounting to Rs 31,120/- for constructing drains in Srikantapura extension in Nanjangud town is sanctioned in G O No L 1047-52/41 73-44-6 dated 7-4-45 and the work is under progress In this estimate the Septic tank is proposed to be located in a private garden near the irrigation channel The main drain also runs in private lands

During my inspection of the above drainage works on 21-4-1947, I observed that if the septic tank is located near the irrigation channel as per the sanctioned plan, the main

drain will have to run in deep cutting (6'-7'), as the drain has to be taken on a rising contour This involves extra earth work and protective works and the cost of this extra work will be Rs 6000/- This is in addition to the sanctioned provision

Secondly, the effluent from the septic tank is proposed to be led in to the irrigation channel The channel runs in the town and the flow in the channel is towards the town from the septic tank It is, therefore, not advisable to leave the effluent into the channel, in the interest of health of the town

Thirdly, as the Septic tank is located in private land, the land has to be acquired and there may be considerable delay in acquiring the lands

To overcome all these difficulties and disadvantages, it is now proposed to run the main drains along a separate alignment and locate the septic tank away from the town The proposed main drain and the septic tank are marked in red on the plan enclosed herewith

The main drain and the septic tank are located in Government land ~~xxx~~ and therefore, the acquisition of these lands does not arise In the new alignment the main drain is taken along a falling contour and deep cutting is hence avoided Another advantage of this proposal is that a vast area of land is available for the treatment of the effluent from the septic tank The treated land may also be used for growing crops or vegetables

The only extra work involved is the construction of an R C C duct across the irrigation channel at the point (B) for leading the sullage It may also be mentioned here that it is possible to work out this proposal within the sanctioned amount of the estimate

As the works are under progress, I have requested the Asst Engineer to proceed with the work according to this new proposal, in anticipation of your kind approval The Asst Engineer is also requested to obtain first before starting the work the approval of the Municipal Council to this proposal

The action taken in this behalf may kindly be approved

THE SECRETARY
9/6

Sir,

Subject: Selection of a site for the construction of a septic tank at Nanjangud

7118

In continuation of my letter number D3-P R 398/47-48 dated 21st May 1948 on the above subject, I have the honour to state that I inspected the site selected by the Sanitary Engineer in Survey Number 56 of Chamalapura village, Nanjangud Taluk for the construction of the septic tank, on 29th May 1948 in company with the Municipal President. The site selected is a private holding adjacent to the burial ground of the Muslims besides being very close to the Adijambava colony. When I inspected the site both the Muslims and the Adijambavas objected for the construction of the sptic tank on the site in question.

A perusal of the enclosed sketch flagged A, will make matters clear. Survey Number 357 is the burial ground of the Muslims. The spot marked in red ink in S No 56 is the site selected for the construction of the septic Tank. The portion marked in red pencil is the Adijambava Colony. Survey Numbers 68, 70 and 71 are proposed to be acquired for the extension of Adijambava Colony and improvement of the Town. Further it is ascertained that an extent of about 32 guntas in S No 56, contiguous to S No 357, the existing burial ground has been purchased and reserved for the same purpose.

Yours,

/13

In the foregoing circumstances, the contension of the Mutt and the Vijayavas has really some force In my opinion, it would serve the purpose of constructing a septic tank if it is located in Survey Number 56, excluding the portion belonging to the Khabarstan, if the Bureau of Sanitary Engineering has no objection The present site where the septic tank is to be built is objectionable

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY COMMISSIONER,

To

JANAB. SYED ABDUL ALEEM, B A ,
Secretary to Government,
Revenue Department, Bangalore

Sir

Subject - Selection of a site for the construction of Septic Tank at Nanjangud

In continuation of this office letter of even No dated 8th June 1948 on the above subject, I have the honour to forward herewith the connected records and to state as follows:-

My predecessor in office Janab Mir Safdar Hussain after inspecting the spot and hearing objections of the Muslim and Adijambava residents has opined that the construction of the Septic Tank on the site originally proposed is objectionable and that a separate spot in the same S No 56 of Chamalapura, excluding the portion belonging to Khabarstnan may be selected for the purpose The Sanitary Engineer Bureau of Sanitary Engineering Bangalore who was accordingly requested to select a separate site has selected a new site in S No 56 excluding the khabarstnan as shown in the enclosed sketch I have inspected the spot and have discussed the matter with the Sanitary Engineer I agree with the opinion of Janab Mir Safdar Hussain as regards the desirability of selecting a separate site for the construction of the septic tank The site now selected for the purpose is quite suitable and the Town Municipal Council have also approved of this I have therefore requested the Sanitary Engineer to kindly arrange for the execution of the work on the new site

It is stated that there will be an extra cost to the extent of Rs 1540/- due to this change of site as a portion of work had already been executed on the original site The President Town Municipal Council Nanjangud states that the Municipality is not in a position to meet this extra cost on account of its poor financial position But in view of the circumstances already explained, selection of a separate site was necessary and I am therefore of opinion that this

19

---

this additional expenditure will by no means be the
ability in the properties. I therefore request that
you will be pleased to sanction a Government
loan of Rs. 770/- to the
municipality out of the Town Improvements for
meeting the above deficit cost

Yours faithfully,

for a Corporation
Deputy Commissioner,
Kolaba District
